

Project Overview: Helvetica Neue Vegeta

As a passionate fan of anime, particularly *Dragon Ball Z*, I embarked on a creative project to merge typography with character design. Using the Helvetica Neue font, I recreated an image of Majin Vegeta, transforming text into visual art. This project was both an enjoyable and insightful exploration of typographic design, demonstrating how fonts can be used to form intricate and recognizable imagery.

Inspired by the creative process and the results, I plan to expand this project further, experimenting with additional characters and styles in the future.
